

Meeting the educational needs of EVERY CHILD

The Leandro Plan

Elizabeth City - Pasquotank Public Schools

North Carolina's legislative roadmap for delivering the constitutional standard of education

Since 1994, the *Leandro v. State of North Carolina* court case has consistently shown that children are being deprived the sound basic education guaranteed by the state constitution.

PROBLEM:

 State funding hasn't kept pace with student needs, forcing districts to **cut back** on staff, services, supplies, technology, and facility upgrades.

SOLUTION:

 The Leandro Plan shows the state how to provide the required education standard by ensuring **adequate funding** and **targeted support** for the unique set of student needs in each district.
